Hi All,
Per your request, I have attached the draft Ventura County Commitment Letter on Contingency Measures for the 2008 8-Hour Ozone Standard for your review and comment. Let me know if you have any questions. Thanks

Hi Ali,

Thanks so much for the update. Hope all is going well with the district's exploration of options. When you are at the point of having drafted a commitment letter, are you willing to share the draft letter with us for review/comment? The wording of the commitment letter is important and a seemingly insignificant wording change might make a difference to our attorneys. =)

Also, are you able to provide another update at this time on your tech assessment?

Thanks so much!!
Anita

Good Morning Anita,

Per our phone conversation this morning, We are currently exploring few options of which one is to amend Rule 74.26-Crude Oil Storage Tank Degassing to include the control of emissions from pipeline cleaning & degassing as well. I will let you know of our findings when we complete our tech assessment. Thanks

Subject: Follow up from call on contingency measure

Hi Ali,

John Kelly is out for a few weeks so I just wanted to follow up with you from our June 28 call on a potential contingency measure from the District for the 2008 ozone plan. I think a couple ideas for possible revisions to existing measures were raised on the call and we also talked about a potential commitment letter around the end of August. Just wanted to check in and see if any further discussions between Ventura, CARB, and EPA would be helpful, or if we can help review or provide input on ideas or a draft letter?

Thanks so much and hope you are well!

Anita
